A Portlet is a multistep, user-facing application delivered through a Web application (e.g., a portal). OASIS approved standard, WSRP, is an attempt to standardize the interface between the provider and the consumer of the Portlet. This initiative promotes Portlet interoperability, componentware practices, and the existence of a Portlet market. This work argues that the diversity of the settings where a Portlet might be syndicated recommends that Portlets be instrumented for variability, and thi ...

The Web Community tolerates bad markup for visual effect even when the practice excludes partially sighted users. This paper describes a two-phase process to recondition websites: deconstruction and building a new skin. It uses cascading style sheets. Deconstruction replaces developer styles with good defaults for partially sighted users. Building a new skin customizes the site for individual preferences. It adjusts font size, font family, color configuration, line height, word spacing and lette ...
